Yes, I know and it works fine. But what I mean is, if it is possible to create a structure with more than one 'node' table? I attached a screen shot where you can see the organisation hierarchy. These occurrences are all stored in one table. Now I have additional tables for the teams and for the team members. And my question is, if these two additional tables can be shown in the tree structure?

The screenshot shows a web application interface for a handball federation structure. At the top, there is a title bar 'Verbandsstruktur' and several navigation buttons: 'Neu', 'Suchen', 'Letzte Suche', 'Altersklassen (Vorgaben)', 'Ebenen', 'Nationen', and 'Ver'. Below this, there are selection controls: 'Selections: [select all](#) | [unselect all](#) | locked '. Further down, there are more buttons: 'Detail', 'Ändern', 'Löschen', 'Audit Trail', 'Hallen', 'Schulen', and 'Vereine'. The main content is a tree view with a 'Select' column on the left and a 'Verband' column on the right. The tree starts with 'IHF International Handball Federation', which is expanded to show 'European Handball Federation'. Under 'European Handball Federation', there are several national federations, including 'Albanien - federata shqiptare e hendbollit', 'Federacio Andorrano D` handbol', 'Handball Federation of Armenia', 'Österreichischer Handballbund', 'Handball Federation of Azerbaijan', 'Union Royale Belge de Handball', 'Rukometni Savez Bosne I Hercegovine' (highlighted in yellow), 'Handball-federation of Belarus', and 'Bulgarian Handball Federation'. The 'Deutscher Handballbund' is also expanded to show a list of regional federations: 'Badischer Handball-Verband e.V.', 'Bremer Handball-Verband e.V.', 'Bayerischer Handball-Verband e.V.', 'Hessischer Handball-Verband e.V.', 'Hamburger Handball-Verband e.V.', 'Handball-Verband Berlin e.V.', 'Handball-Verband Brandenburg e.V.', 'Handball-Verband Mittelrhein e.V.', 'Handball-Verband Mecklenburg-Vorpommern e.V.', and 'Handball-Verband Niederrhein e.V.'.
