This update contains some fixes to deal with BC breaks in PHP version 8.4 as well as some other minor updates.

Database changes:
- none

Other changes:
updated include.xml.php5.ic in INCLUDES folder for POPUP controls so that â€˜foreign_fieldâ€™ attribute includes the Modelsâ€™ zone (in the screen structure file) as a prefix if the zone is not â€˜mainâ€™ or â€˜innerâ€™.
updated include.xml.php5.ic in INCLUDES folder for DROPDOWN controls so that â€˜optionlistâ€™ does not include a blank entry if the field is marked as â€˜requiredâ€™.
updated std.table.class.inc so that the convertTimeZone() method performs the check empty($timezone_client) in the right place.
updated std.table.class.inc so that the convertTimeZone() method so that if the userâ€™s language is Thai then the convertCalendarToGregorian() function will be called.
updated std.table.class.inc so that the formatData() method so that if the userâ€™s language is Thai then the convertCalendarFromGregorian() function will be called.
updated std.table.class.inc so that the getData() method will move a value for â€˜curr_or_histâ€™ from $where to $this->sql_search.
updated std.table.class.inc so that the _sqlAssembleWhereLink() method will terminate if either of $this->inner_table or $GLOBALS[â€™link_sql_selectâ€™] is empty.
updated std.table.class.inc so that the _sqlAssembleWhereLink() method has better logic when constructing the $sql_select string.
updated std.table.class.inc so that the _sqlAssembleWhereLink() method has better logic when constructing the $sql_from string.
updated std.table.class.inc so that the _sqlAssembleWhereLink() method will update the $select string to include a reference to the alt_language_table when the userâ€™s language is not the same as the default language.
updated std.table.class.inc so that the _sqlSelectAlternateLanguage() method has better logic.
updated std.table.class.inc so that the _sleep() method will not remove columns from $this->fieldarray if the tableâ€™s zone is â€˜innerâ€™ and the column name is in the screen structure file.
updated php_session.class.inc in AUDIT subsystem so that it implements SessionHandlerInterface (as required in PHP version 8.4).
updated include.library.inc so that the setSessionHandler() function use the modified php_session class.
updated include.session.class.inc to replace DebugBreak() with xdebug_break(), and to comment out calls to logstuff().
updated std.multi5.inc to include a call to $dbouter->validateUpdate() after the call to $dbouter->array_update_associative().
updated std.multi5.inc to change the logic around the call to $dbouter->customButton().
updated std.multi5.inc to replace the call to $dbouter->custom_commonValidation() with $dbouter->validateUpdate().

updated std.multi5.inc to include a call to $dbinner->getFieldarray() after the call to $dbouter->popupReturn().
updated nusoap.php from version 41 to 1610.
updated various scripts to replace trigger_error() with fatal_error().
updated various scripts to replace DebugBreak() with xdebug_break().
