On trying to logon to Radicore afte rintalling it I get an error:

Fatal error: singleton::require_once() [function.require]: Failed opening required 'classes/php_session.class.inc' (include_path='.;c:/wamp/www/radicore/menu;c:/www/wamp/radicore/audit;c:/wamp/www/radicore/workflow;c:/wamp/www/radicore /includes') in c:\wamp\www\radicore\includes\std.singleton.php5.inc on line 35

Thought the file is there under c:\wamp\www\radicore\audit dir and it is part of the include path as shown above in the error msg.

Please help what is that I am missing.

Thanks

The second entry in your include path is wrong. You have 'c:/www/wamp/radicore/audit' when it should be 'c:/wamp/www/radicore/audit'.
