Subject: Setting PK field to NOEDIT, but not NOSEARCH

Another issue: I set the PK of a field to NOEDIT, but not NOSEARCH.
On the UPDATE form it is indeed NOEDIT, which is what I want, because it is auto-incrementing.
However, on the SEARCH page, the PK field is listed, but not editable.

This is correct behaviour. If the NOSEARCH option is not set then the field will not be automatically removed from the SEARCH screen. If the NOEDIT option is set then the field will always be non-editable, even in search screens. If you want to change this then you should put code in the _cm_changeConfig() method to remove the field's NOEDIT option when the current pattern is "SRCH" or $GLOBALS['mode'] == 'search'.
