I have installed postgreSQL 8.2 in windowsXP system and tried to connect to it after exporting all the schemas to the database radicore. Then an error message like the following occured.
Fatal error: Call to undefined function pg_connect() in c:\wamp\www\radicore1.24\includes\dml.pgsql.class.inc on line 145. Kindly help me to solve the problem.

Thanking u.
Douglas D'Silva

That message means that the PostgreSQL extension has not been enabled in your PHP installation. You must go to your PHP.INI file and remove the ';' in front of 'extension=php_pgsql.dll'.

Dear Sir,
You r exactly right. Your suggestion solved my problem. Thanks a lot.

Regards
Douglas
