Hi,

I'm trying to use POPUP txn and found some inconsistency between your tutorial and the framework.

In your tutorial, I have to fill in 'Task ID' and 'Foreign field' to use POPUP control. But when I update a field for this, I can not see any of these field. And this is true for your xample database's X\_PERSON.node\_id.

I took screenshots for you.

Can you tell me what could be wrong here?

OK.  
It works in 1.28.

---

Thanks
