Hi,

I keep getting the message:

Warning: mysqli_errno() expects parameter 1 to be mysqli, null given in c:\wamp\www\radicore\includes\dml.mysqli.class.inc on line 575

This application has encountered an unrecoverable error
The following has been reported to the administrator:

2007-10-02 10:54:27
Fatal Error: mysqli_connect() [function.mysqli-connect]: (/1045): (#).

Error in line 49 of file 'c:\wamp\www\radicore\includes\dml.mysqli.class.inc'.

Script: /radicore/menu/logon.php

Remote Address: 127.0.0.1
Request URI: /radicore/menu/logon.php?menu=153e5efbbf5e5017e48d258c1aff44 d8[/I]

Warning: session_destroy() [function.session-destroy]: Trying to destroy uninitialized session in c:\wamp\www\radicore\includes\error.inc on line 201

At the login page. Checked and rechecked password and db settings but to no avail. Anyone with an idea? (I'm using radicore with wampserver)

This means that the call to mysqli_connect() failed to make a connection to the server, which in turn made the call to mysqli_errno() fail as it was not given a valid resource.

Try changing the code inside dml.mysqli.class.inc to the following and try again.

```
function getErrorNo ()
// return number of last error.
{
    if (empty($this->dbconnect)) {
        $errno = null;
```

```
        } else {
            $errno = mysqli_errno($this->dbconnect);
        } // if

        return $errno;

    } // getErrorNo
```

Hopefully this should display the reason for the failed connection.

Changing the dml.mysqli.class.inc file hasn't helped. It still gives the same error message.

The fix that I gave you should not call mysqli_errno() if the resource is empty, therefore you should not be getting the message

Warning: mysqli_errno() expects parameter 1 to be mysqli, null given

When I try to force a connection error on my PC I always get a meaningful error message, so something must be seriously wrong with your installation. I can only suggest that you debug the connect() method inside dm.mysqli.class.inc to see what is causing this error.

I also suggest that you try using the latest version of Radicore.

Forgive my not posting the actual error message, which is:

This application has encountered an unrecoverable error

The following has been reported to the administrator:
2007-10-02 15:16:24

Fatal Error: mysqli_connect() [function.mysqli-connect]: (/1045): (#).

Error in line 49 of file 'c:\wamp\www\radicore\includes\dml.mysqli.class.inc'.

Script: /radicore/menu/logon.php

Remote Address: 127.0.0.1

Request URI: /radicore/menu/logon.php?csxslt=off

Warning: session_destroy() [function.session-destroy]: Trying to destroy uninitialized session in c:\wamp\www\radicore\includes\error.inc on line 201

The 2nd warning message:

Warning: mysqli_errno() expects parameter 1 to be mysqli, null given

has disappeared.

This means that the mysqli_connect() function is failing. Check that the values in your config.inc file are correct.

You will need to debug the connect() method inside dml.mysqli.class.inc to see what is causing this error.
