This version contains the following changes:

Database changes:
- none

Other changes:
amended all database classes (dml.???.class.inc) to include the ability to work with non-recursive Common Table Expressions (CTE) with any number of expressions.
amended 'std.table.class.inc' and 'include.library.inc' to deal will some of the options presented with having multiple non-recursive CTEs.
fixed bug in 'std.multi4.inc' which disabled the scrolling through multiple rows of the outer entity after the first row was displayed.

Hi Tony,
for your information: you added your config.inc to the includes directory.
