View Forum Message <> Reply to Message

Error Message:

Fatal error: require_once() [function.require]: Failed opening required '/var/www/includes/tcpdf/config/tcpdf_config.php' (include_path='.:/var/www/includes/:../menu:../audit:../work flow') in /var/www/includes/tcpdf/tcpdf_php5.php on line 137

The path config/tcpdf_config.php is hard coded in tcpdf_php5.php, but the configuration file is at the higher directory level.

Workround on linux:

cd includes/tcpdf/
mkdir config
ln -s tcpdf_config.php config/

Whoops I somehow did not include the 'includes/tcpdf/config' directory when I created the zip file, so please use the attached file.

File Attachments
1) includes.zip, downloaded 1614 times
