[SIZE=3]Hello.....
I have a member table.Also i have a field mem_position in member table.I want to make that field to checkbox .what function uses in classes files.and also how to update that field.I tried to update.But it shows checkbox only for boolean.please tell me details of checkbox[/SIZE]

A boolean field only has two possible values - TRUE or FALSE. The HTML controls which you can use are checkbox, radio group or dropdown list.
