Im setting up my application with a postgresql database and this is the error message i get when i try to login,.
Does anyone has a solution?
and has someone already setup a radicore application with postgresl?

Fatal Error: PostgreSQL: ERROR: 3F000: schema "audit" does not existLOCATION: assign_search_path, namespace.c:2898.

SQL query: SET search_path TO "audit", public

The clue could be in the error message: schema "audit" does not exist

Have you actually followed the installation instructions and created the AUDIT database?
