Subject: Issues with Radicore V 1.75
Posted by juanguilarte on Wed, 04 Jul 2012 16:31:39 GMT
View Forum Message <> Reply to Message

1.I have some problems with the header. It doesnÂ´t show the header. I replace in the xls library the std.head with the old one V1.62 and show the header but I canÂ´t use the new feature (favorites, etc.)

2. I have fatal error en some request. For example:

a.-2012-07-04 11:52:38
Error fatal: Cannot extract token from: '= ='454600'' (# 256).

Error en linea 6013 del archivo 'C:\wamp\www\radicore\includes\include.library.inc'.

PHP_SELF: /radicore/sistemapagos/reg_fin_th(multi2).php

b. 2012-07-04 11:54:15
Error fatal: Cannot extract token from: '= ' (# 256).

Error en linea 6013 del archivo 'C:\wamp\www\radicore\includes\include.library.inc'.

PHP_SELF: /radicore/sistemapagos/reg_misc_th(search).php

Everything is working in V 1.62

I will appreciate your comments

Regards

Juan Guilarte

If you get a blank page instead of an HTML response it means that the script aborted before it got to the part where it builds the HTML output. In your development environment you should have the following in your php.ini file:

display_errors = on
error_reporting = E_ALL

The error message "Cannot extract token from: '= ='454600'' (# 256)" tells me that you have a badly constructed query such as "field= ='454600'"" with TWO '=' signs and TWO single quotes at the end. This is invalid, so fix it in your code.

I am using the framework to work with MYSQL and I am using the framewok with ORACLE database. However when I do query in Oracle it work fine with some pattern and navigation bottom but bring me the logon screen in others (list2), when I do the same query with MYSQL the framework work without problem.

I will appreciate your advices

Regards

Although I useMySQL most of the time, I have tested it with PostgreSQL, Oracle and SQL Server, and I have never encountered any such problem. You need to step through with your debugger to see where it is failing.

Additional information:

The oracle database is 11g.

I had to add the dbprefix to the schema in dml.oracle.ohp5 for the system database (audit, dict, menu) and i has issue with the "lock upadate".

I found in the PHP_SESSION program that i can in the write section it loss the data_session information and send me to the logon screen.

Than you in advance for you observation

Best regard

Sorry I made some mistakes

Additional information:

The oracle database is 11g.

I had to add the dbprefix to the schema in dml.oracle.php5 for the system database (audit, dict, menu) in the "dml.oracle.php5.inc" module. I had a issue with the "for update" in the "//deal with row locking (optional)" in the same module "dml.oracle.php5.inc".

In the debbuging process the "PHP_SESSION.CLASS.INC" when it process the $this->_dml_updateRecord($array,$old_data[0]) send me back to the logon screen.

Than you in advance for you observations

Best regard

Juan Guilarte

There was a bug in the Oracle driver. A fixed version is in the attached file. Tell me if this fixes your problem.

I'm afraid that I cannot reproduce this error. I have run through the code that issues that SQL statement several times and it never fails. I have run the statement using The Oracle SQL Developer tool, and it never fails.

I'm running Oracle version 10g Express Edition with all the default settings.

View Forum Message <> Reply to Message

I have just installed Oracle 11g to see if I could duplicate this error, and it failed with exactly the same statement. I had a check inside file 'dml.oracle.php5.class.inc' to detect and ignore this error, but it seems that it is now needed inside file 'error.inc' as well. There is an updated version in the attached file - try it and see if it fixes your problem.

Whoops! I forgot to add the details to the database.

It's there now, so you can download it.

I have run through the 'generate.php' function several times, using both a MySQL and Oracle database, and I can't find anything wrong. Perhaps you have a corrupt installation. I would suggest that you try downloading a fresh copy and reinstalling.

View Forum Message <> Reply to Message

Windows 7, Apache 2.4.3, PHP 5.4.7

I notice that you are using an all-in-one WAMP installation. This sometimes causes problems, which is why I never use all-in-one installers and always install each component separately.

I have some issue with float datatype when i try to update or insert table columns in the dictionary database.

T am using Radicore V 1.76 and Oracle Database 11g Enterprise Edition Release 11.2.0.1.0

I attached the message

Thank you in advance

Juan Guilarte

Can you provide the CREATE TABLE script for that table? I need to be able to replicate exactly the same settings on my PC so thatI can debug it.

Sure this is the create script:

```
CREATE TABLE "TREOMDP_SISTEMA_PAGOS"."REG_MOV_FAC"
   ( "EMPRESA_FT" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
 "BIN_TARJ_FT" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
 "NUM_TARJ_FT" FLOAT(126) DEFAULT '0' NOT NULL ENABLE,
 "CONSE_MOV" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
 "COD_MOV" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
 "NUM_AUTO_MOV" CHAR(7 CHAR) DEFAULT '0' NOT NULL ENABLE,
 "NRO_COMER_MOV" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
 "NUM_SUC_MOV" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
 "MONTO_MOV" FLOAT(126) NOT NULL ENABLE,
 "MONEDA_MOV" CHAR(2 CHAR) DEFAULT 'BS' NOT NULL ENABLE,
 "MONTO_EXT_MOV" FLOAT(126) NOT NULL ENABLE,
 "MONEDA_EXT_MOV" VARCHAR2(2 CHAR) DEFAULT '  ' NOT NULL ENABLE,
 "MONTO_INTER_MOV" FLOAT(126) NOT NULL ENABLE,
 "MONEDA_INTER_MOV" VARCHAR2(2 CHAR) DEFAULT '  ' NOT NULL ENABLE,
 "FECHA_PRO_MOV" DATE DEFAULT to_date('0001-01-01', 'yyyy-mm-dd') NOT NULL
ENABLE,
```

"NOMBRE_CON_MOV" CHAR(25 CHAR) NOT NULL ENABLE,
"FECHA_TRAN_MOV" DATE DEFAULT to_date('0001-01-01', 'yyyy-mm-dd') NOT NULL ENABLE,
"CONT_COM_MOV" CHAR(1 CHAR) NOT NULL ENABLE,
"FECHA_DEP_MOV" DATE DEFAULT to_date('0001-01-01', 'yyyy-mm-dd') NOT NULL ENABLE,
"CON_NRO_MOV" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
"NOM_PAIS_MOV" CHAR(8 CHAR) NOT NULL ENABLE,
"PROCED_MOV" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
"TIPO_MOV" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
"MARCA_AJU_MOV" CHAR(1 CHAR) NOT NULL ENABLE,
"NRO_REF_INC_MOV" CHAR(23 CHAR) NOT NULL ENABLE,
"CATEGORIA_COMER_MOV" NUMBER(10,0) DEFAULT '0' NOT NULL ENABLE,
"FECHA_FT" CHAR(10 CHAR) DEFAULT to_date('0001-01-01', 'yyyy-mm-dd') NOT NULL ENABLE,
CONSTRAINT "PRIMARY_31" PRIMARY KEY ("BIN_TARJ_FT", "NUM_TARJ_FT", "FECHA_FT", "CONSE_MOV")

The problem was caused by FLOAT(126) which created a minimum/maximum value which was out of range. I have fixed this, and included the updated file in the attachment.

Mr. Marston

I am using Radicore V 1.76 and I have some trouble when I try to insert a new "Relationship By Table", giving me this message "File 'relationship(add2).php' does not exist".

Thank you in advance

Juan Guilarte

Subject: Re: Issues with Radicore V 1.75

View Forum Message <> Reply to Message

The contents of your menu database appears to be out of date. The original 'relationship(add2).php' file has been split into two giving 'relationship(add2)a.php' and 'relationship(add2)b.php'.

I suggest you try reloading file 'radicore/dict/sql/dict.menu_export.sql'. This will reload all the menu details for the 'dict' subsystem.
