This version contains the following changes:

updated Import Columns function in Data Dictionary so that any existing comment is not overwritten with what has been defined in the dictionary database.
updated XSL stylesheets to remove various errors reported by http://validator.w3.org/.
updated XSL stylesheets to put 'title' attribute on images and navigation buttons so that they show up as tooltips in HTML pages.
fixed problem in 'Generate PHP Scripts (a)+(b)' which failed to enclose $dbprefix in double quotes when constructing the sql query.
updated 'std.pdf.class.inc' to allow an image to be used in 'detail view - multiple'.
updated 'std.data_field.xsl' so that when a checkbox with a label appears in a search screen as a radiogroup, the label is shown in front of the group.
fixed bug in 'std.filepicker1.inc' which failed to toggle sorting on the 'date' column.
modified 'std.datevalidation.class.inc' to include $GLOBALS['date_format'] = 'yyyy-mm-dd' in the config file so that it can display dates in the format '2001-06-21'.
