This version contains the following changes:

Database changes:
- none

Other changes:

added '$this->no_foreign_data' flag to 'std.table.class.inc' to prevent 'getForeignData()' method from being called automatically.
amended 'std.search1.inc' and 'std.multi5.inc' to set $this->no_foreign_data to TRUE.
fixed bug in 'std.xml.php4/5.inc' when displaying error messages which are not associated with a field on the screen.
fixed bug in 'xml2array' function inside 'radicore.xmlreader.inc' when an element contains a child element of the same name.
amended 'std.batch.inc' and 'error.inc' to properly report errors with 'require()' function in batch jobs.
removed the getBrowserLanguage(), matchBrowserLanguage() and saveLocaleFormat() functions from 'include.library.inc' and placed them inside 'language_detection.inc' so that they can be used without referencing 'include.library.inc'.
updated the '_cm_getValRep()' method within 'mnu_user.class.inc' so that the $where argument is used in the call to getData(). This will allow the list of users to be filtered by the contents of the $where string.
fixed bug in 'std.validation.class.inc' where a non-numeric value in a numeric field was not being reported correctly in the error message.
updated 'dml.mysqli.class.inc' to output any MySQL warnings, such as silent data truncation, into the message area.
updated 'mnu_subsystem_s01.class.inc' (subsystem export) to deal with MNU_TIME_LIMIT_ROLE and MNU_TIME_LIMIT_USER tables.
updated all 'dml.*.class.inc' to include the '__toString()' method which can be used when the error handler is invoked.
created 'error_logs' directory to hold the 'errorlog.html' file which is appended to by the error handler in 'error.inc'.
upgraded TCPDF library to version 6.0.024.
